Orders, handled on WhatsApp.

Customers chat in Sinhala, Tamil or English. Gemini understands them. The code decides prices, stock and payments. The owner stays in control.

Enter demo ↗ View on GitHub

SellBot

A platform that talks to customers in their own language

Three steps from a WhatsApp message to a paid, delivered order. Every step runs in the real code.

01

02

03

Customer chats

Text, photos and payment slips in Sinhala, Tamil or English arrive through the WhatsApp Cloud API.

AI understands

Gemini returns intent, language and confidence. Deterministic code enforces price floors, stock and ownership.

Owner manages

Orders, payment-slip review, delivery and stock in one admin. AI can never mark an order paid.

EXPLORE THE PROJECT

Pick where to start

01

Admin dashboard

Orders, payment review, delivery board, products and analytics, on fictional data.
